Cloud First Strategy

We have reached the cloud tipping point

It's a Hybrid World

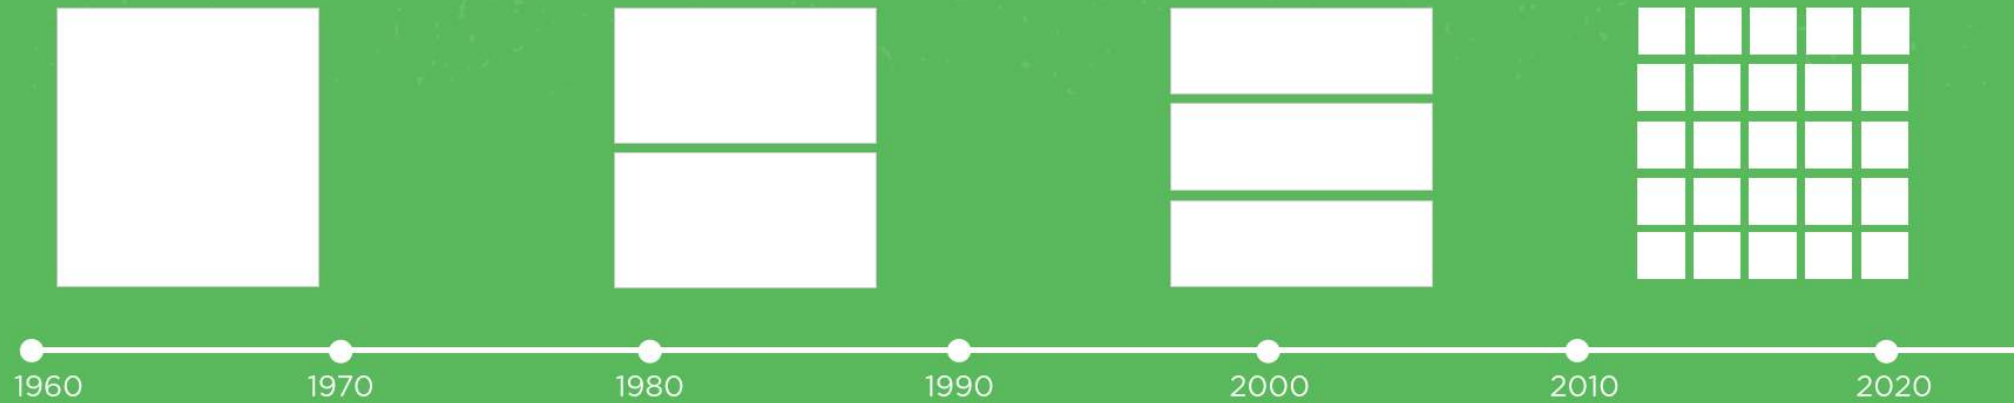

Public Cloud

Private Cloud

On Premise

ABSTRACTION IN THE ENTERPRISE

Era of
Mainframe

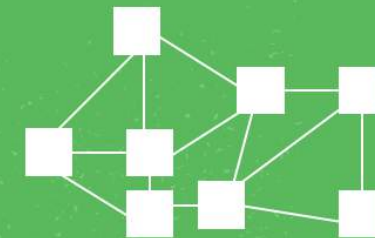

Era of Client
Server

Era of the
Web

Era of
the Cloud

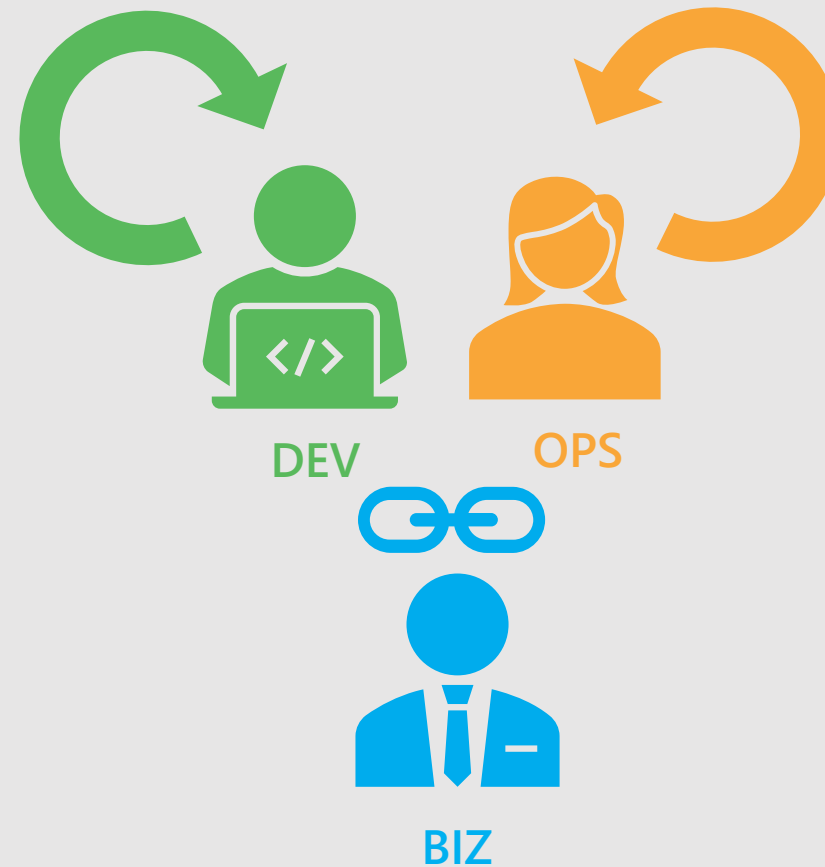

A Microservice Architecture is based on single-function modules with well defined interfaces and operations called APIs

Changing the way we
develop solutions

Agile DevOps BizDevOps

Actively engage business within application development
and operations teams to ensure better business outcomes

The API economy

growing rapidly

Infrastructure

Data Center

Cloud Hosted

Hybrid

Application

Monolith

N-tier

Microservices

Process

Agile

DevOps

BizDevOps

New Strategic Blueprint

Digital Enterprise Solutions

<p>Customer Focus</p> 	<p>Delivering the end to end journey</p>
<p>Rapidly Deployable</p> 	<p>Rapid delivery led by business</p>
<p>Scalable</p> 	<p>Open for total Interconnectivity</p>
<p>Secure</p> 	<p>Gated connection to resources wherever they are</p>

On the way to Digital Transformation, companies are seeking the simplicity of smart phone apps

Our Vision: Business Automation as a Service

Provide the Cloud Based
Orchestration Engine for
Digital Transformation !

1

Democratize Digital
Transformation

Democratize Business
Processes

2

Enable Citizen
Developers

Tools that Everyone can
Use

3

Transform How People
Work

Do the Right Thing, do
Things Right

4

Transform How
Customers are Engaged

Delight the customer

Digital Transformation is more than just automation, but automation is a key enabler of Digital Transformation

Process Automation is crucial to ensure a great Customer Experience during the Customer Journey

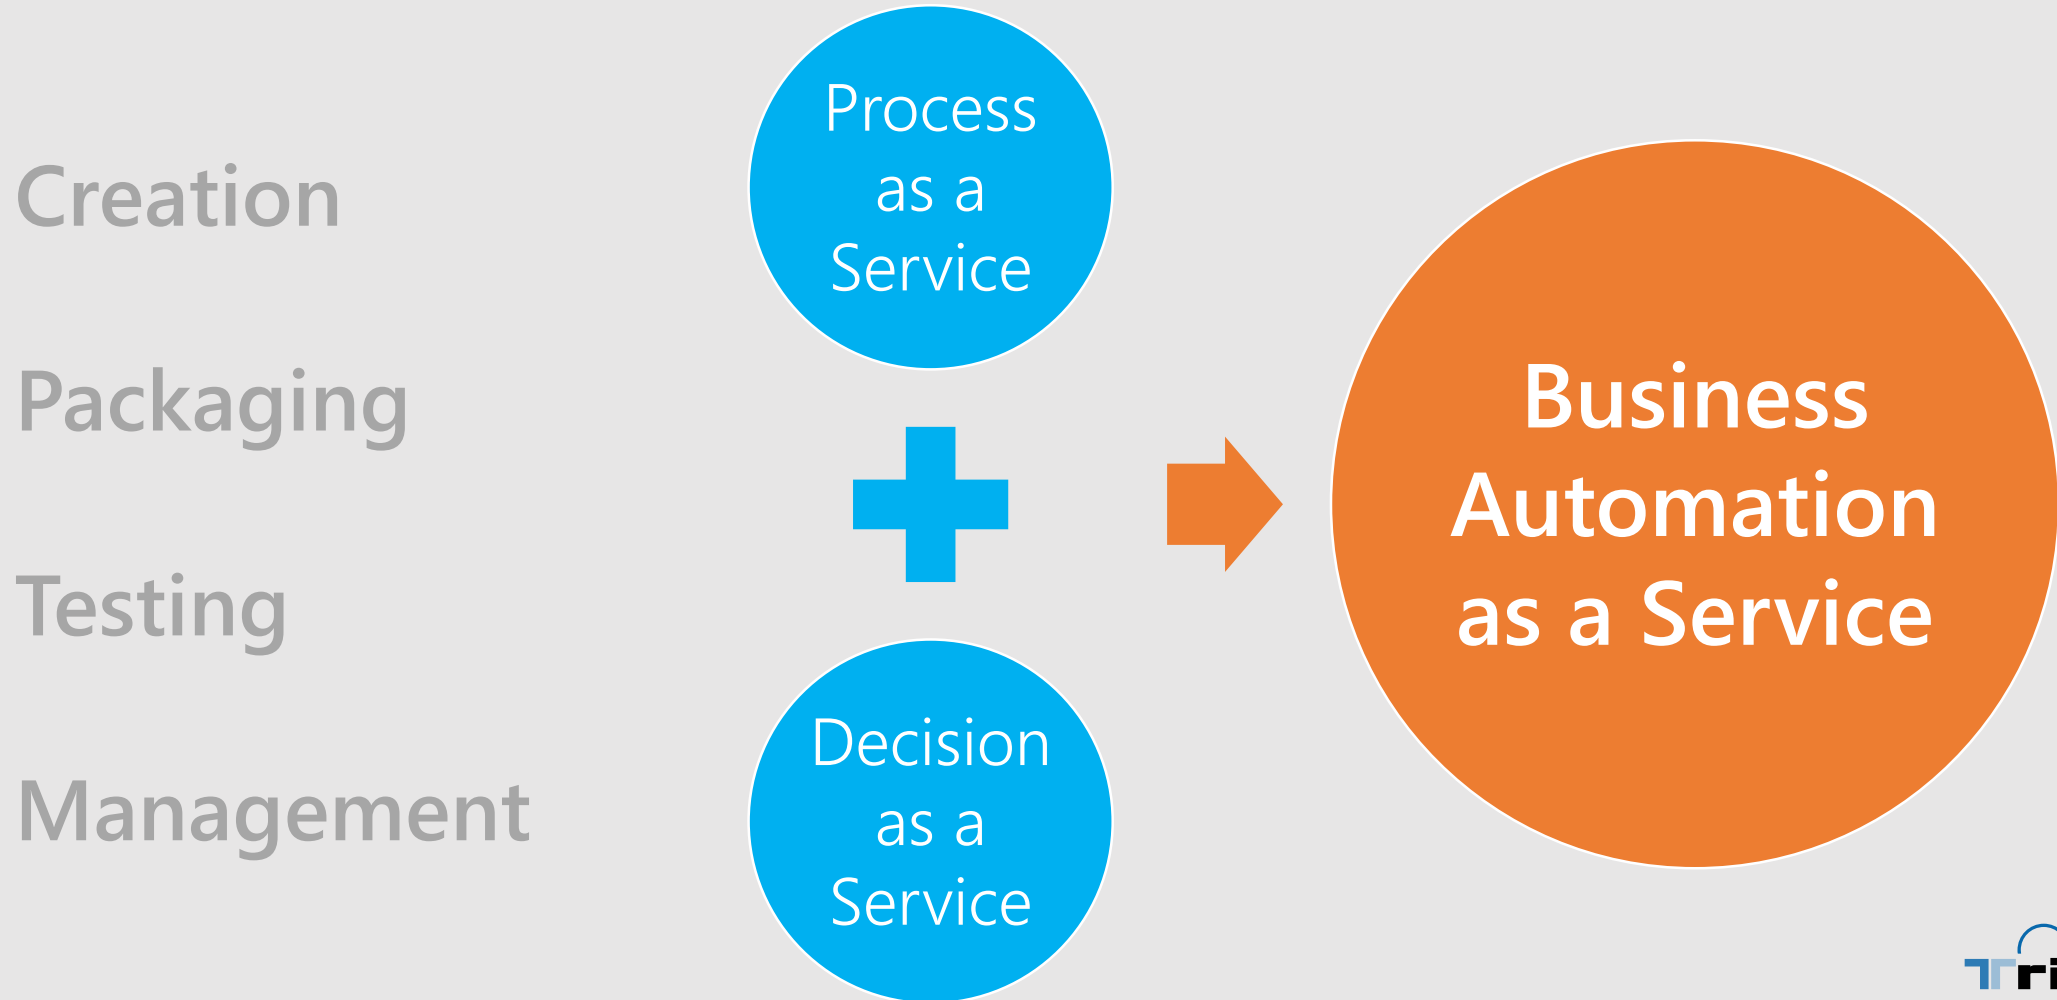

Intelligent Business Automation

- Combining efficient **Doers** with effective **Thinkers**
- Orchestrating **Business Processes** with **Business Decisions**

Business Automation as a Service

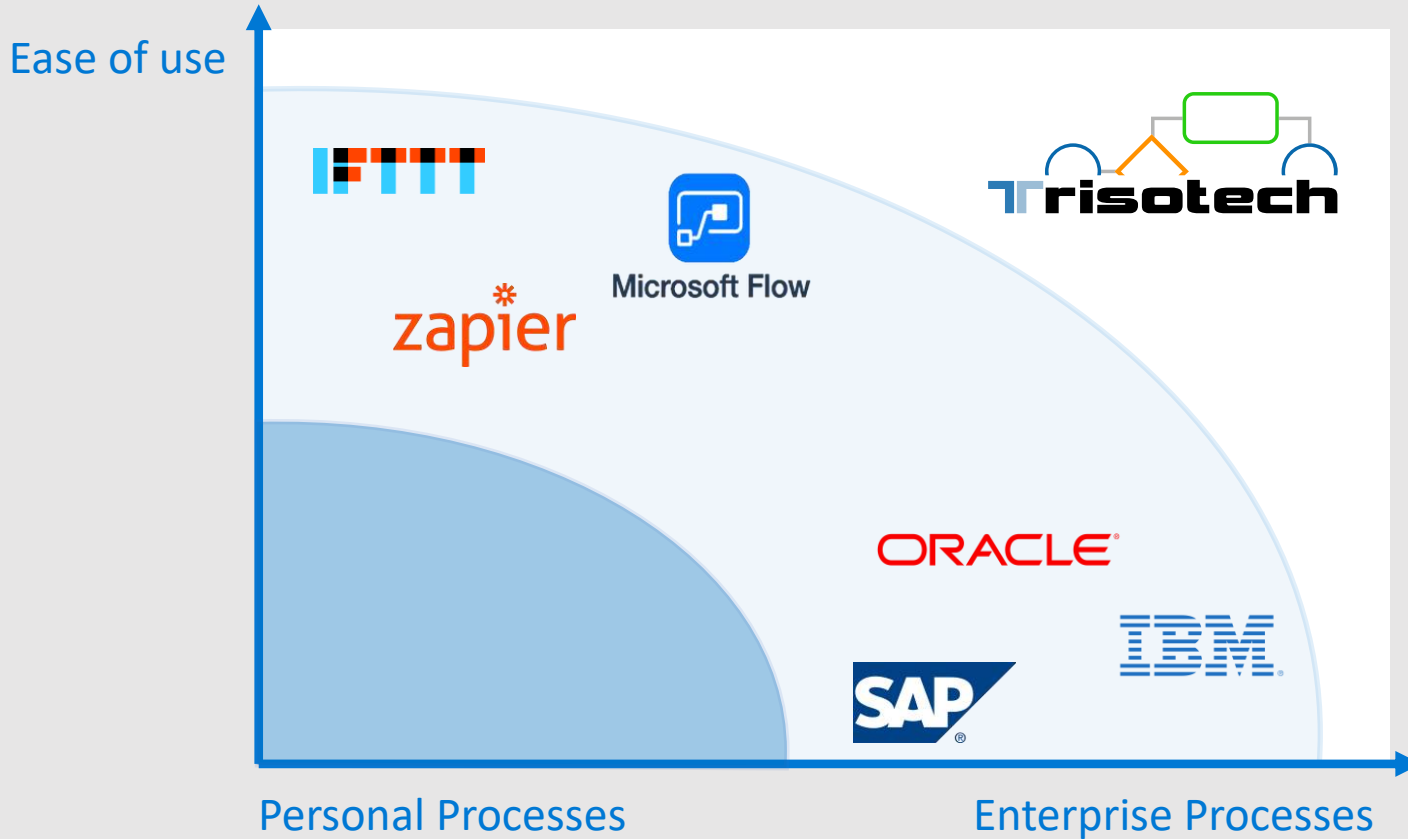

Cloud Based Orchestration Stimulates Innovation & Facilitates Automation

Individuals and organizations work smarter by automating process and operating decisions across apps, data and smart objects (things)

The next wave of business automation

Simple Intuitive Interfaces that Business Users love

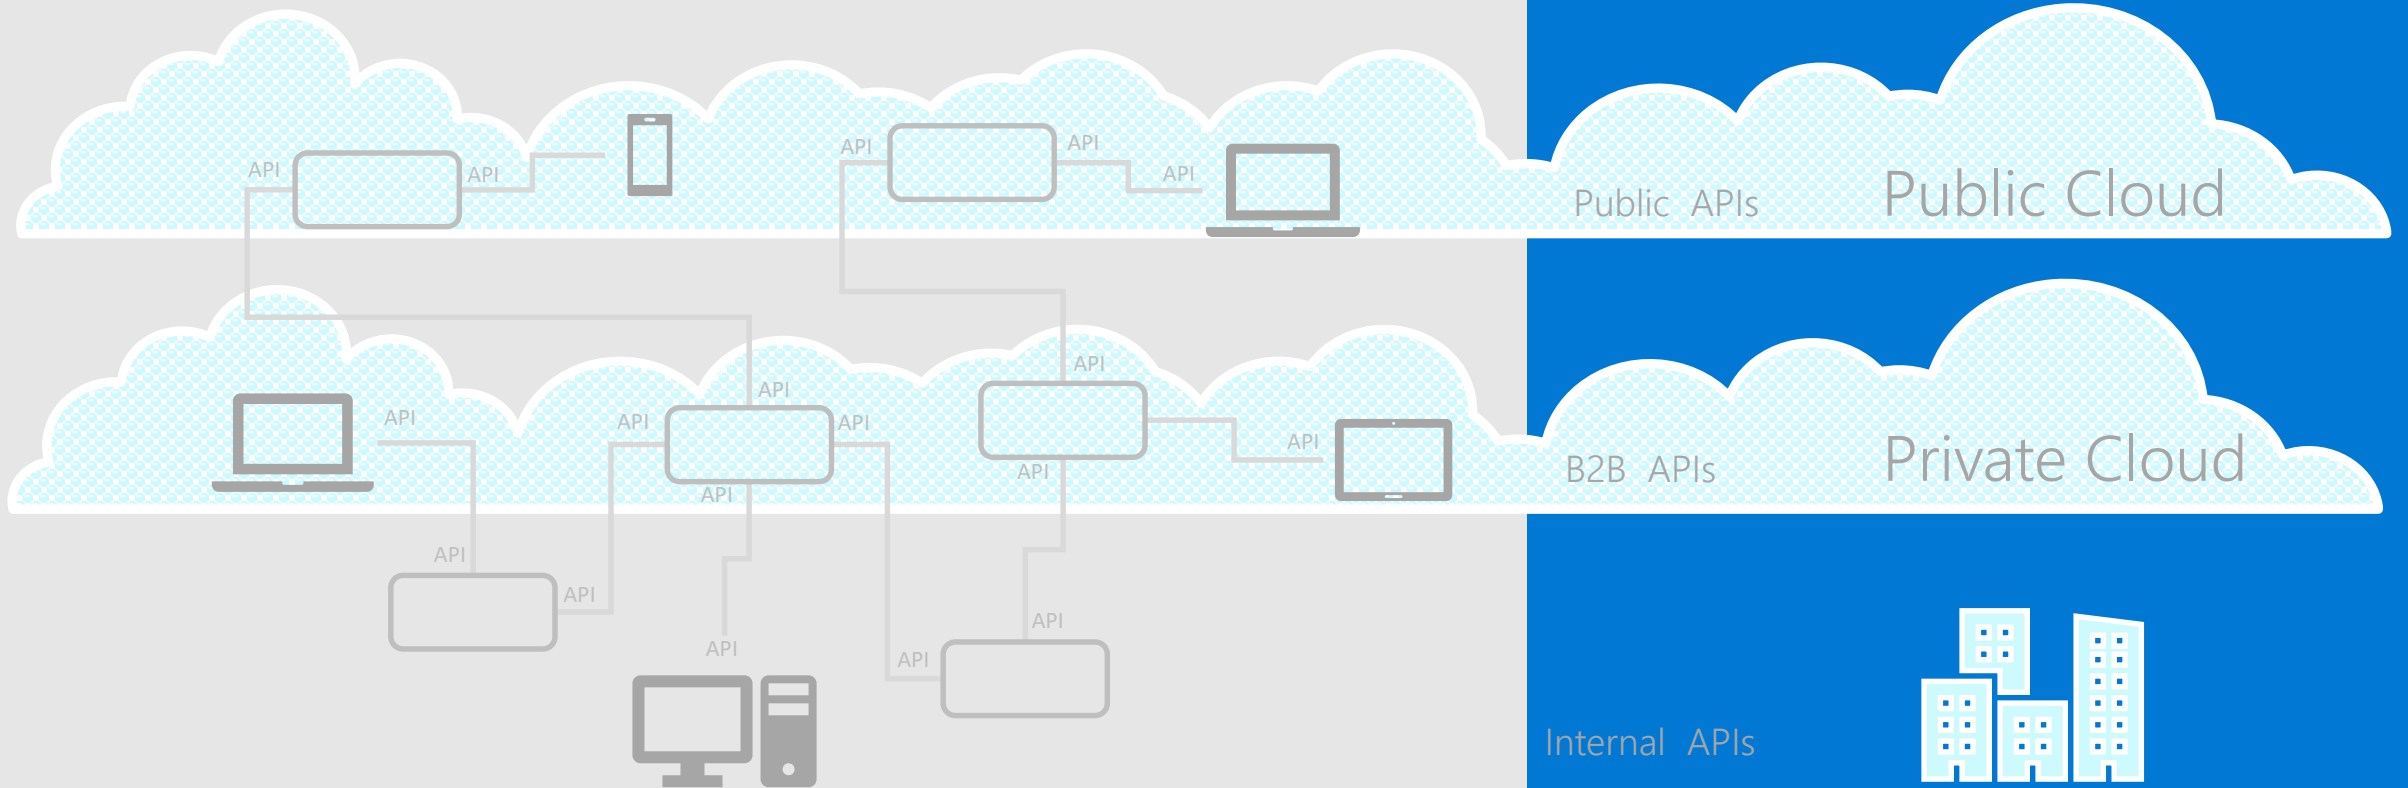

Technical Expressiveness that Developers require

Integration and connectivity are key

Connectivity to Any

Data Source

Personal Automation

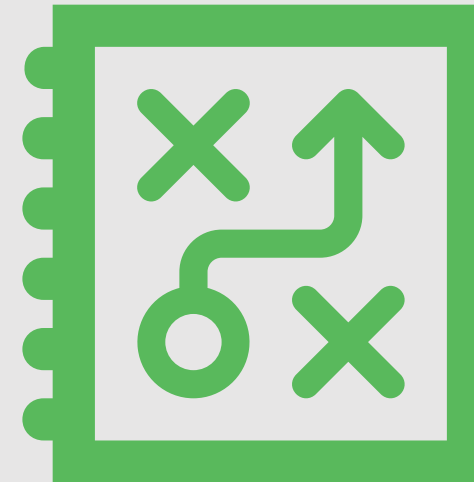

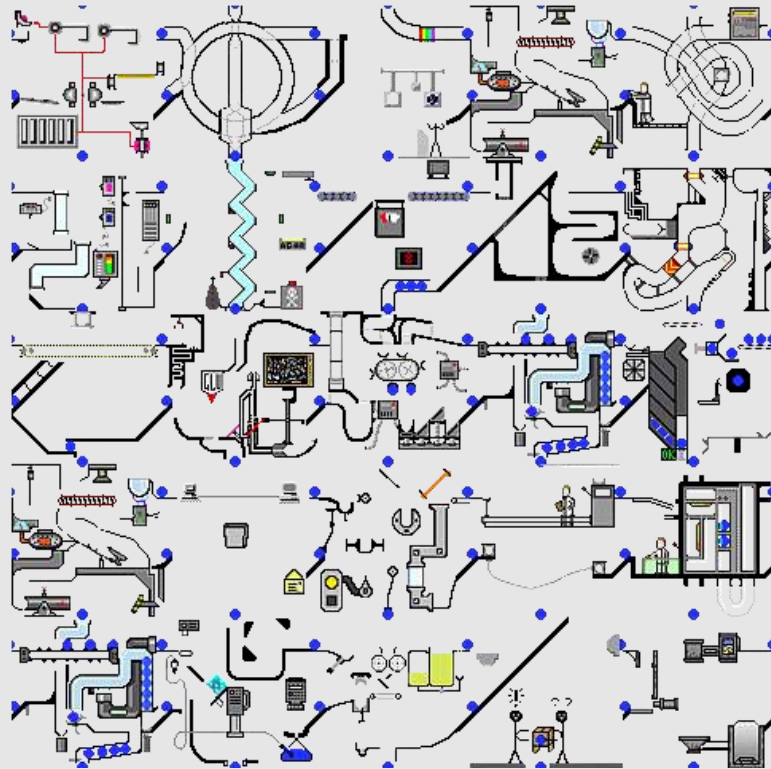

- Keeping simple things simple

IF  THEN 

Complex Enterprise Automation

Translating complexity into simplicity

Will have an impact across your business

Faster, Easier, Smarter: Get all three

Disruptive tools lead to disruptive ideas,
which lead to disruptive practices

Our platform offers quick starts, low initial costs that grow with
business value

Business Automation as a Service

Get started today
